James' interest in medical education, especially that of early career doctors, grew during his role as the Director of Prevocational Education

graded autonomy so that interns are able to develop increasing independent practice. Any change to the internship model needs to recognise its potential impact on this delicate balance.

In my opinion, the current intern model provides an important and valuable transition for doc

excellent doctors. So why change? Because significant improvements can be made in this space especially in the regards to the development of a national intern curriculum and more rigorous work based assessment. I hope that the findings of the review changes internship for the better and not just for changes sake.
