

Part 1: COVID-19 in Pregnancy

Apr 18, 2020 | 0 

|      
| COVID-

What is the concern about pregnancy?

Physiological changes in pregnancy

Oxygen consumption increases by 20%.

Tidal volume increases 40% with a proportional rise in minute ventilation. Total lung capacity and functional residual capacity are all reduced by the third trimester due to the gravid uterus pushing on the diaphragm.

COVID-19 symptoms in pregnant patients

Mode of delivery

Recovering from COVID-19 while pregnant

Summary
